

Greetings from Polytechnique Montréal!

We are pleased to announce the launch of our **2014 Summer Research Internship Program**. Your students will have the chance to work in laboratories at the cutting edge of technology and within an institution that is ranking among the top-3 Canadian Universities in terms of research intensity in the field of engineering. More than 15 research projects are presented in the attached document (2014_Summer Internship). Students can also decide to pick another area of expertise developed by Polytechnique.

Duration: The recommended duration of the internship is a minimum of 4 months, usually taking place between May and September 2014. Other duration or period can be negotiated to suit your university schedule.

Financial Arrangement: Two packages are available for 4 months maximum:

- 1) Free on-campus accommodation and weekly allowance of \$100 CAD
- 2) Student finds its own apartment and gets a monthly allowance of \$1000 CAD.

Deadline: Students must send electronically the required documents by December 10, 2013. Results will be announced in January 2014. We are sorry about the short delay but it is to make sure that students have enough time to get their work permit.

Application Procedure: Students may obtain more information (incl. eligibility criteria, application procedure, financial arrangement, etc.) in the attached document "2014_POLY-MTL_Summer Internship". They must also submit the attached "Specification Sheet" when they apply.

Each successful applicant shall be counted as a spot of exchange.

Please do not hesitate to contact me if you require further information. Look forward to welcoming many of your students!

Sincerely yours,

Nathalie PELLETIER (Ms.)
