# UNIVERSITI MALAYA

## VISION

A global university impacting the world.

## MISSION

Pushing the boundaries of knowledge and nurturing aspiring leaders.

## CORE VALUES

## TAGLINE

*Home of the Bright, Land of the Brave*  
*Di Sini Bermulanya Pintar, Tanah Tumpahnya Berani*

# INTRODUCTION TO FACULTY OF ENGINEERING

*The profession in which a knowledge of the mathematical or natural sciences gained by study, experience and practice is applied with judgement to develop ways to utilize, economically, the materials and forces of nature for the benefit of mankind.*

**Accreditation Board for Engineering and Technology**  
(FORMERLY The Engineers' Council for Professional Development (ECPD))

**Engineering** is not simply an academic field that deals with technology, statistics, and science. It is an exciting and rewarding discipline that has a much wider scope, ranging from basic science to applied technology. Engineers make a significant difference in the lives of millions of people.

Through identifying problems and seeking new solutions, they create and design items that benefit the lives of everyone, from cars, computers, and buildings, through to life saving equipment, the generation of energy and medical procedures. Engineering is not about what the world is, it is about what the world can be.

Innovative engineers possess the ability to use approaches, processes, resources, behaviors and mindsets of innovation culture using knowledge and expertise in emerging technologies.

**INNOVATIVE**

Effective leadership influences others to effectively collaborate to implement transformative change and innovation. It requires personal effectiveness and the ability to synthesize diverse expertise and skillsets to inspire people to engage with the organization's vision.

**LEADERSHIP**

Ethics in engineering practices is directed by respect for ethical beliefs and values, and for the dignity and rights of others. It promotes good practices through mutual respect and trust, integrity, honesty, accountability, transparency, equality and fairness.

**ETHICAL**

Adaptive engineers embrace change, experimentation and innovation. They leverage on the creativity of an entire organization to adapt and thrive in a multitude and myriad of evolving environments.

**ADAPTIVE**

Dynamic engineers are influencers, that understand the importance of inspiring others and achieving success through teamwork. They have the ability to properly analyze situations and take deliberate, calculated risks to move the team forward.

**DYNAMIC**

# i-LEAD

**Innovative engineer with exceptional Leadership, Ethical, Adaptive and Dynamic values**

# MESSAGES FROM DEAN

**PROFESSOR IR. DR. NIK NAZRI BIN NIK GHAZALI**

**Dean**

As we launch into another dynamic academic year at Universiti Malaya's Faculty of Engineering, I want to extend my warmest welcome to each of you. This is a time of great potential, where your creativity and determination can lead to groundbreaking advancements.

The engineering field is rapidly evolving, and with it comes the responsibility to approach challenges with innovative solutions and a commitment to sustainability. I encourage you to explore the intersections of technology, ethics, and community engagement in your work. Let's harness this opportunity to not only advance your skills but also to become responsible engineers who contribute positively to society.

Moreover, I want to emphasize the value of collaboration and inclusivity in our faculty. Every voice matter, and the diversity of our community enriches our collective experience. I urge you to participate actively in campus life, join clubs, engage in workshops, and seek opportunities for interdisciplinary projects.

Together, we can create a supportive environment where everyone feels empowered to share their ideas and pursue their passions. As we move forward, let's commit to uplifting one another, fostering innovation, and making the most of the resources available to us. I am excited to see the extraordinary contributions each of you will make to faculty and beyond.

# THE MANAGEMENT

**ASSOC. PROF. DR. RAJA ARIFFIN RAJA GHAZILLA**  
Deputy Dean (Undergraduate)

**ASSOC. PROF. IR. DR. ONG ZHI CHAO**  
Deputy Dean (Postgraduate)

**PROFESSOR IR. DR. MOHD FAIZUL MOHD SABRI**  
Deputy Dean (Research)

**DR. SUHANA KOTING**  
Deputy Dean (Student Affairs)

**PROFESSOR IR. DR. NIK NAZRI NIK GHAZALI**  
(Dean)

**ASSOC. PROF. IR. DR. NASRUL ANUAR ABD RAZAK**  
Deputy Dean (Development)

**MADAM VIGNESHREE KING**  
MANAGER

# HEAD OF DEPARTMENT

## **Assoc. Prof. Dr. Juliana Usman**

Head of Biomedical Department

Tel: 603 7967 4581

Fax: 603 7967 1378

Email: [fk\\_jkb@um.edu.my](mailto:fk_jkb@um.edu.my)

## **Assoc. Prof. Dr. Anis Salwa Khairuddin**

Head of Electrical Department

Tel: 603 7967 5205

Fax: 603 7967 1378

Email: [fk\\_jke@um.edu.my](mailto:fk_jke@um.edu.my)

## **Assoc. Prof. Dr. Nurin Wahidah Mohd Zulkifli**

Head of Mechanical Department

Tel: 603 7967 5204

Fax: 603 7967 1378

Email: [fk\\_jkm@um.edu.my](mailto:fk_jkm@um.edu.my)

## **Ir. Dr. Huzaifa Hashim**

Head of Civil Department

Tel: 603 7967 4584

Fax: 603 7967 1378

Email: [fk\\_jka@um.edu.my](mailto:fk_jka@um.edu.my)

## **Dr. Haneef Farzana Hizaddin**

Head of Chemical Department

Tel: 603 7967 5206

Fax: 603 7967 1378

Email: [fk\\_jkk@um.edu.my](mailto:fk_jkk@um.edu.my)

# DEPUTY DEAN (UNDERGRADUATE STUDIES)

**ASSOC. PROF. DR. RAJA ARIFFIN BIN RAJA GHAZILLA**

**Deputy Dean (Undergraduate)**  
Tel: 03-7967 5201  
Email: fk\_tdid@um.edu.my

**MRS. NURHANI MUHAMAD ZAINALID**

*Curriculum Review, Academic Programme,  
Registration Graduate Engineer*

**Assistant Administrative Officer**  
Tel: 03-7967 5298  
Email: nurhani@um.edu.my

**MRS. MUNIRAH BINTI KAMARAL ZAMAN**

*Timetable, Student/Visa Confirmation Letter*

**Senior Administrative Assistant**  
Tel: 03-7967 5234  
Email: munirah26@um.edu.my

**MS. IRMADIANA DAUD**

*Add & Drop Courses, Credit Exemption, Industrial Training*

**Senior Administrative Assistant**  
Tel: 03-7967 6849  
Email: dianadaud\_hcp@um.edu.my

**MISS NUR SYAZANA MOHAMMAD NIZAR**

**Assistant Registrar (Undergraduate)**  
Tel: 03-7967 7636  
Email: syazananzar@um.edu.my

**MRS. NOOR ARHANANI HASAN**

*Examination, Appeal Result*

**Senior Administrative Assistant**  
Tel: 03-7967 7605  
Email: Hananie\_77@um.edu.my

**MRS. ROHAYU MOHD NOR**

*Admission, Course Registration, CTES*

**Senior Administrative Assistant**  
Tel: 03-7967 5298  
Email: rohayu@um.edu.my

**MR. MOHD RAFIZUDIN BIN RAFIZ**

*Office Secretary*

**Administrative Assistant**  
Tel: 03-7967 5204  
Email: m.rafizudin@um.edu.my

# COORDINATORS

**ASSOC. PROF. IR. DR. ONN CHIU CHUEN**

Industrial Training Coordinator  
Tel : 03-7967 7679  
Email: onnchiuchuen@um.edu.my

**ASSOC. PROF. DR. TAN CHEE GHUAN**

Programme Coordinator  
Tel : 03-7967 7652  
Email: tancg@um.edu.my

**TS. DR. LEONG GEOK WEN**

Timetable Coordinator  
Tel : 03-7967 5359  
Email: geokwen@um.edu.my

**GS. TS. DR. SAZNIZAM SAZMEE SINOH**

Academic Advisor & Final Year Project Coordinator  
Tel : 03-7967 5271  
Email: saznizam@um.edu.my

**DR. FARAHIN MOHD JAIS**

Student Affairs Coordinator  
Tel : 03-7967 5284  
Email: farahin.mohdjais@um.edu.my

# ACADEMIC STAFF

## PROF. IR. DR. FARIDAH OTHMAN

Specialization:  
Water and Environmental Engineering,  
Computer Modelling & GIS Application  
Tel: 03-7967 4584  
Email: faridahothman@um.edu.my

## IR. DR. MOHD RASDAN IBRAHIM

Specialization:  
Highway Engineering, Traffic and  
Transportation Engineering  
Tel: 03-7967 6881  
Email: rasdan@um.edu.my

## PROF. IR. DR. UBAGARAM JOHNSON ALENGARAM

Specialization:  
Concrete Materials, Lightweight Concrete,  
Structural Behavior  
Tel: 03-7967 7632  
Email: johnson@um.edu.my

## DR. WAN ZURINA WAN JAAFAR

Specialization:  
Remote sensing & GIS, Hydrometeorology,  
Climate Change  
Tel: 03-7967 7677  
Email: wzurina@um.edu.my

## ASSOC. PROF. DR. ZAINAH IBRAHIM

Specialization:  
Structural Engineering, Structural Dynamics  
Tel: 03-7967 4460  
Email: zainah@um.edu.my

## IR. TS. DR. YUEN CHOON WAH

Specialization:  
Traffic & Transport Engineering  
Tel: 03-7967 5355  
Email: yuencw@um.edu.my

## ASSOC. PROF. IR. DR. NORAZURA MUHAMAD BUNNORI

Specialization:  
Structural Health Monitoring, Acoustic &  
Concrete Technology  
Tel: 03-7967 6884  
Email: nmb77@um.edu.my

## DR. SUHANA KOTING

Specialization:  
Traffic & Transportation Engineering,  
Highway Engineering  
Tel: 03-7967 7648  
Email: suhana\_koting@um.edu.my

## ASSOC. PROF. IR. TS. DR. MELDI SUHATRIL

Specialization:  
Geotechnical Engineering, Earthquake  
Engineering, Forensic Engineering  
Tel: 03-7967 5224  
Email: meldi@um.edu.my

## DR. NURUOL SYUHADAA MOHD

Specialization:  
Water & Wastewater Treatment,  
Environmental Engineering  
Tel: 03-7967 7650  
Email: n\_syuhadaa@um.edu.my

# ACADEMIC STAFF

## DR. ONN CHIU CHUEN

Specialization:  
Life Cycle Analysis, Waste Management,  
Eco Profile, Environmental Impact  
Assessment & (carbon, water) Footprints  
Tel: 03-7967 5269  
Email: onnchiuchuen@um.edu.my

## DR. TAN CHEE GHUAN

Specialization:  
Structural & Earthquake Engineering  
Tel: 03-7967 7652  
Email: tancg@um.edu.my

## DR. YAP SOON POH

Specialization:  
Concrete Materials & Structural  
Engineering  
Tel: 03-7967 7649  
Email: spyap@um.edu.my

## IR. TS. DR. HUZAIFA HASHIM

Specialization:  
Heritage Engineering, Forensic  
Engineering  
Tel: 03-7967 7679  
Email: huzaifahashim@um.edu.my

## TS. DR. MUHAMMAD SHAZRIL IDRIS IBRAHIM

Specialization:  
River & Coastal Engineering, Physical &  
Numerical Modelling & Natural Disaster  
Management  
Tel: 03-7967 5285  
Email: shazril.idris@um.edu.my

## TS. DR. LEONG GEOK WEN

Specialization:  
Lightweight Concrete Materials, Fibre,  
Textile Reinforced Concrete & Marine  
Concrete  
Tel: 03-7967 5359  
Email: geokwen@um.edu.my

## DR. SAZNIZAM SAZMEE SINOH

Specialization:  
Building Information Modelling &  
Life Cycle Assessment  
Tel: 03-7967 5271  
Email: saznizam@um.edu.my

## DR. FARAHIN MOHD JAIS

Specialization:  
Water and Wastewater  
Tel: 03-7967 5284  
Email: farahin.mohdjais@um.edu.my

# SUPPORT STAFF

**MRS. RAMLAH ABDUL RAZAK**

Administrative Assistant  
Tel: 03-7967 5203

# STUDENT AFFAIRS

## Introduction

**Deputy Dean (Student Affairs) Office Faculty of Engineering, Universiti Malaya**, is dedicated to supporting the holistic development and well-being of the students. The office oversees various aspects of student life, providing essential services that enhance the student experience, including student welfare, competition, student associations, co-curricular activities, competition, exchange program, professional development opportunities/ upskilling program and scholarship information. We strive to ensure that every student receives the necessary resources and support throughout their academic journey.

## Team

## Core Functions

### Student Welfare

Our office is committed to student welfare, providing a range of services to address financial aid, counselling, and other support systems.

### Competitions and Student Clubs

We actively support student participation in engineering competitions, both locally and internationally, to foster innovation and practical learning. Our office also encourages students to join and lead engineering clubs and societies, promoting leadership, teamwork, and co-curricular involvement.

### Upskilling Programs

To ensure our students are equipped for the evolving demands of the engineering industry, we offer a range of upskilling programs, workshops, and training sessions. These initiatives focus on developing critical skills such as leadership, communication, and technical expertise to prepare students for future careers.

### Co-Curricular Activities

In addition to academic excellence, we believe in the importance of well-rounded personal development. Our office provides resources and opportunities for students to participate in various co-curricular activities, enhancing university experience and preparing for a balanced professional life.

### Exchange Programs

We facilitate student exchange programs with universities worldwide, offering our students the opportunity to gain international exposure, broaden their perspectives, and enhance their learning experience in diverse academic and cultural settings.

### Scholarship Opportunities

The Deputy Dean's Office provides information and guidance on various scholarships available to our students. These scholarships aim to support academic excellence and alleviate financial burdens, allowing students to focus on their studies and professional development.

For any inquiries, feel free to reach out to us at [fk\\_tdhep@um.edu.my](mailto:fk_tdhep@um.edu.my).

# STUDENT ENGAGEMENT DEPARTMENT

## Civil and Environmental Engineering Club Universiti Malaya (CEEC)

---

Civil and Environmental Engineering Club University Malaya (CEEC UM) is a student body that assists the Civil Engineering Department to take care of the welfare of the department students, facilitate the learning process of students beyond classrooms and ultimately lead to the enhancement of their academic performance. CEEC UM has been established since 2004.

As one of the pioneering societies at Universiti Malaya, CEEC UM has been active in its outreach and engagements with the engineering industry in order to produce the best Civil Engineers, aligned with the vision and mission in hand, CEEC UM has always been committed to striving for excellence

### Mission

---

Provide a platform for students to be exposed to the industrial world.

### Vision

---

Assist in shaping and empowering future leaders in the civil engineering field by sharpening competencies and expanding networks.

## Institution of Civil Engineers Universiti Malaya Student Chapter (ICEUMSC)

Institution of Civil Engineers Universiti Malaya Student Chapter (ICEUMSC) is one of the student chapters under the Institution of Civil Engineers (ICE). The club aims to increase students' knowledge and perspective by giving them a range of civil engineering experience, helping students to develop their abilities and share their knowledge, building links with other institutions, organizations, and learned societies as well as organizing civil engineering seminars, workshops, visits, and inter-universities competitions.

### Mission and Vision

---

- Increase students' knowledge and perspective by giving them a range of civil engineering experience.
- Help students to develop their abilities and share their knowledge.
- Build links with other institutions, organizations and learned societies.

## Student Mobility Program

---

Outbound Mobility Program is a program that allows all Universiti Malaya students to spend one or two semesters at our partner universities abroad. Students will be able to take courses in the regular semester with credit transfer opportunity. This program is offered to both undergraduate and postgraduate (coursework mode) students

# **RULES AND REGULATIONS**

All students are required to follow **Universiti Malaya (Bachelor's Degree) Rules & Regulations 2024**, which include key aspects such as registration, payment, duration of study, structure of programme of study, examination, appeal and graduation. For more detailed information on the university regulations, please meet your Programme Coordinator and/or visit:

**<https://engine.um.edu.my/um-wow-2025-2026>**

# BACHELOR OF CIVIL ENGINEERING

## Introduction

---

**The Department of Civil Engineering** is one of the first academic departments set up under the Faculty of Engineering, University of Malaya in 1956. The Department currently offers academic programme at undergraduate, Master of Engineering Science and Doctor of Philosophy levels.

## Programme Synopsis

---

The Department is sub-divided into four clusters, namely, Structural and Material; Water and Environment; Soil, Geotechnical Engineering and Survey; Transport and Construction Management. The department is actively engaged in R&D works with financial support from the University, government, and other industrial grants. Many academic members of the Department are also pursuing engineering consultancies requiring expertise in multidisciplinary areas.

The Bachelor of Engineering (Civil) programme was introduced in the year 1956 as a 4-years programme under the Term System. The programme was recognized by the Malaysian Public Services Department (JPA) and the Board of Engineers Malaysia (BEM). In the 1996/1997 academic session, a major change was undertaken in the programme where the Bachelor of Engineering (Civil) programme was offered as a 3-years degree programme under the semester system (Sistem Pengajian Tiga Tahun, SPTT). In the same academic session, the Bachelor of Engineering (Environmental) programme was introduced as a 3-years degree programme. Both programmes were accredited by the Board of Engineers Malaysia on 21 August 2000.

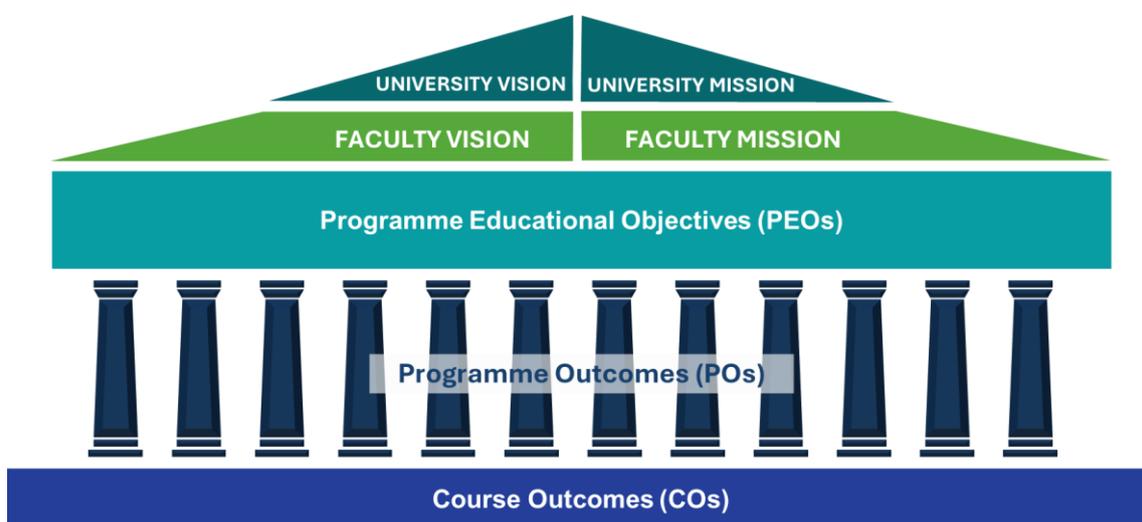

Starting from the 2000/2001 academic session, under the instructions from the Ministry of Education of Malaysia, both programmes were offered as a 4-years degree programme under the semester system (Sistem Pengajian Empat Tahun, SPET). The first batch of graduates from these two programmes graduated in August 2004.

For the betterment and continuous quality improvement of the programme, a series of 5-year cycles of curriculum review exercises has been performed. The curriculum review is done to align the programme in accordance with the requirements of the MQF, EAC, industries and other stakeholders. Following a major curriculum review in 2015, a new curriculum structure was introduced starting from the 2016/2017 academic session where the programme has been renamed as Bachelor of Civil Engineering. The latest cycle of curriculum review was conducted in 2021 and an updated curriculum is implemented for the intake session 2022/2023 onwards.

## Outcome-Based Education (OBE)

Outcome-Based Education (OBE) had been implemented in the Faculty of Engineering since 2004, in accordance with the directives of the Ministry of Higher Education Malaysia and the Board of Engineers Malaysia (BEM). This is also one of the requirements for Malaysia to become a full member of the Washington Accord (WA), an international agreement to mutually recognize Bachelor degrees in the field of engineering.

OBE is an internationally practised educational model that focuses on the measurement of student outcomes and the implementation of corrective measures to overcome deficiencies in course delivery methods/assessment/student attitude, etc. Curriculum is designed with specific course outcomes (COs) to prepare the graduates to achieve the graduate attributes/programme outcomes (POs) at the point of graduation. The POs are designed to produce graduates who are well-prepared to achieve the programme educational objectives (PEOs) 3 - 5 years after they have graduated. The PEOs and POs had been formulated in consultation with all major stakeholders (employers, alumni and students), to meet the demands of a challenging and globalized workplace.

# UNIVERSITY COURSES

The list of university courses offered for each semester could be found through the following link:

<https://citra.um.edu.my/list-of-university-courses>

## A. Student Holistic Empowerment (SHE)

The Student Holistic Empowerment (SHE) courses are categorized into four (4) clusters:

### Cluster 1

---

Thinking Matters: Mind and Intellect

### Cluster 2

---

Emotional, Physical and Spiritual Intelligence: Heart, Body & Soul

### Cluster 3

---

Technology/Artificial Intelligence and Data Analytics: i-Techie

### Cluster 4

---

Global Issues and Community Sustainability: Making the World a Better Place

All students are required to register one (1) course from each cluster.

## B. Co-curricular Courses

The list of co-curricular courses available is as follows:

CODE	COURSE
GKA1001	Attach@Industry
GKI1001	Independent Research
GKK1001	Community Services
GKP1001	Talent Development
GKS1001	Volunteerism
GKU1001	Entrepreneurship

## **University Courses**

**GIG1012: Falsafah dan Isu Semasa / *Philosophy and Current Issues***

Kredit <i>Credit</i>	2
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Melayu <i>Malay</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menjelaskan isu semasa berlandaskan ilmu falsafah, Falsafah Pendidikan Kebangsaan dan Rukun Negara.</li> <li>2. Menerangkan isu semasa berdasarkan aliran pemikiran utama dalam pelbagai aliran falsafah.</li> <li>3. Menghuraikan isu semasa melalui perspektif perbandingan falsafah sebagai asas bagi menjalinkan dialog antara budaya.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Explain current issues based on philosophy, the Philosophy of National Education and the Rukunegara.</i></li> <li>2. <i>Explain current issues based on the main of thoughts from the various streams of philosophy.</i></li> <li>3. <i>Explain current issues through a comparative perspective of philosophy as a basis for establishing inter-cultural dialogue.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Kursus ini merangkumi hubungan ilmu falsafah dengan Falsafah Pendidikan Kebangsaan dan Rukunegara. Penggunaan falsafah sebagai alat untuk memurnikan budaya pemikiran dalam kehidupan melalui seni dan kaedah berfikir serta konsep insan. Topik utama dalam falsafah iaitu epistemologi, metafizik dan etika dibincangkan dalam konteks isu semasa. Penekanan diberi kepada falsafah sebagai asas bagi menjalin dialog antara budaya serta memupuk nilai sepunyai. Di hujung kursus ini pelajar akan mampu melihat disiplin-disiplin ilmu sebagai satu badan ilmu yang komprehensif dan terkait antara satu sama lain.</p> <p><i>This course covers philosophical relations with the Philosophy of National Education and Rukunegara. The use of philosophy as a tool to purify the culture of thought in life through the arts and methods of thinking and human concepts. The main topics in philosophy are epistemology, metaphysics and ethics discussed in the context of current issues. Emphasis is given to philosophy as a basis for fostering intercultural dialogue and fostering one's values. At the end of this course students will be able to see the disciplines of science as one comprehensive body of knowledge and related to each other.</i></p>
Pemberatan Penilaian <i>Assessment Weightage</i>	<p>Penilaian Berterusan / <i>Continuous Assessment</i>: 70% Peperiksaan Akhir / <i>Final Examination</i>: 30%</p>

**GIG1013: Penghayatan Etika dan Peradaban /  
Appreciation of Ethics and Civilisations**

Kredit <i>Credit</i>	2
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Melayu (pelajar warganegara) / Bahasa Inggeris (pelajar bukan warganegara) <i>Malay (local students) and English (international students)</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada No
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menjelaskan konsep etika dari peradaban yang berbeza.</li> <li>2. Membandingkan sistem, tahap perkembangan, kemajuan sosial dan kebudayaan merentas bangsa.</li> <li>3. Membincangkan isu kontemporari berkaitan ekonomi, politik, sosial, budaya dan alam sekitar daripada perspektif etika dan peradaban.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Explain the ethical concepts of different civilizations.</i></li> <li>2. <i>Compare systems, levels of development, social progress and culture across nations.</i></li> <li>3. <i>Discuss contemporary issues related to economic, political, social, cultural and environmental from the perspective of ethics and civilization.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Kursus ini menerangkan tentang konsep etika daripada perspektif peradaban yang berbeza. Ia bertujuan bagi mengenal pasti sistem, tahap perkembangan, kemajuan dan kebudayaan sesuatu bangsa dalam mengukuhkan kesepaduan sosial. Selain itu, perbincangan berkaitan isuisu kontemporari dalam aspek ekonomi, politik, sosial, budaya dan alam sekitar daripada perspektif etika dan peradaban dapat melahirkan pelajar yang bermoral dan profesional. Penerapan amalan pendidikan berimpak tinggi (HIEPs) yang bersesuaian digunakan dalam penyampaian kursus ini. Di hujung kursus ini pelajar akan dapat menghubungkan etika dan kewarganegaraan berminda sivik.</p> <p><i>This course discusses ethical concepts from different civilization perspectives. It aims to identify the systems, developmental stages, progress and culture of a nation in strengthening social cohesion. In addition, discussions on contemporary issues in the economic, political, social, cultural and environmental aspects from an ethical and civil perspective can produce students who are morally and professionally sound. The application of appropriate High Impact Education Practices (HIEPs) is used in the delivery of this course. At the end of this course students will be able to relate ethics and civic-minded citizenship.</i></p>
Pemberatan Penilaian <i>Assessment Weightage</i>	Penilaian Berterusan / <i>Continuous Assessment</i> : 70% Peperiksaan Akhir / <i>Final Examination</i> : 30%

**GIG1003: Asas Pembudayaan Keusahawanan /  
Basic Entrepreneurship Enculturation**

Kredit <i>Credit</i>	2
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menerangkan konsep asas keusahawanan.</li> <li>2. Menghasilkan idea keusahawanan yang kreatif dan inovatif.</li> <li>3. Membangunkan kerangka rancangan perniagaan.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Explain the basic concepts of entrepreneurship.</i></li> <li>2. <i>Producing creative and innovative entrepreneurial ideas.</i></li> <li>3. <i>Develop a business plan framework.</i></li> </ol>
Sinopsis Kandungan Kursus <i>/ Synopsis of Course Contents</i>	<p>Kursus ini menerapkan elemen asas pembudayaan keusahawanan kepada semua pelajar. Inisiatif ini diambil untuk membuka minda dan merangsang semangat keusahawanan kepada kumpulan sasaran yang berpotensi. Antara topik yang akan diajar termasuklah konsep dan perkembangan keusahawanan, faktor yang menggalakkan keusahawanan, perkembangan keusahawanan di Malaysia, etika keusahawanan, kreativiti dan inovasi dalam keusahawanan dan merancang perniagaan. Di samping itu, kursus ini juga memberikan pelajar latihan yang lebih bermakna dan berkesan mengenai pemikiran, kemahiran dan kecekapan keusahawanan.</p> <p><i>The course will attempt to inculcate the basic elements of entrepreneurship in the students. Initiatives are taken to open their minds and motivate the entrepreneurial spirit in this potential target group. The course encompasses theory and development of entrepreneurship, factors affecting entrepreneurship, entrepreneurship development in Malaysia, ethics of entrepreneurship, creativity and innovation in entrepreneurship and developing business plans. This course also incorporates a direct exposure to entrepreneurial mindset, skills and competencies.</i></p>
Pemberatan Penilaian <i>Assessment Weightage</i>	<p>Penilaian Berterusan / <i>Continuous Assessment</i>: 100% Peperiksaan Akhir / <i>Final Examination</i>: 0%</p>

## English Communication Programme (Path 1)

### GLT1018: Proficiency in English I

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	CEFR A2+ <ul style="list-style-type: none"> <li>• MUET BAND 2</li> <li>• IELTS Band 4.0</li> <li>• TOEFL Paper-Based Test (437 – 473)</li> <li>• TOEFL Computer-Based Test (123 – 150)</li> <li>• TOEFL Internet-Based Test (41 – 52)</li> <li>• PTE (Academic) – (10 – 28)</li> </ul>
Course Learning Outcomes	At the end of the course, students are able to: <ol style="list-style-type: none"> <li>1. Identify information in short, simple reading texts.</li> <li>2. Present ideas related to everyday topics.</li> <li>3. Use grammar correctly to express ideas.</li> </ol>
Synopsis of Course Contents	This course is designed for students with basic proficiency in English. Focus is on building speaking and reading competence with an emphasis on accuracy in grammar and on vocabulary building.
Assessment Weightage	Continuous Assessment: 60% Final Examination: 40%

### GLT1019: Let's Speak

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	GLT1018
Course Learning Outcomes	At the end of the course, students are able to: <ol style="list-style-type: none"> <li>1. Organise a speech in stages.</li> <li>2. Apply appropriate skills and strategies when delivering a short speech.</li> <li>3. Present a short speech.</li> </ol>
Synopsis of Course Contents	This course focuses on preparing a speech in English accurately and coherently. It also develops students' speech planning skills in stages. Students will learn to speak accurately using the appropriate language strategies to a selected audience.
Assessment Weightage	Continuous Assessment: 100% Final Examination: 0%

**GLT1020: Fundamental Writing**

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	GLT1018
Course Learning Outcomes	At the end of the course, students are able to: 1. Write short, connected texts on familiar subjects. 2. Organise ideas effectively for different purposes.
Synopsis of Course Contents	This course is designed for students with a pre-intermediate level of proficiency in English. It focuses on writing skills, with an emphasis on accuracy in grammar and vocabulary building. Students will be exposed to writing strategies that will enable them to write short texts effectively for different purposes.
Assessment Weightage	Continuous Assessment: 100% Final Examination: 0%

## English Communication Programme (Path 2)

### GLT1021: Proficiency in English II

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	CEFR B1 <ul style="list-style-type: none"> <li>• MUET BAND 3</li> <li>• IELTS Band 4.5 – 5.0</li> <li>• TOEFL Paper-Based Test (477 – 510)</li> <li>• TOEFL Computer-Based Test (153 – 180)</li> <li>• TOEFL Internet-Based Test (53 – 64)</li> <li>• PTE (Academic) – (29 - 41)</li> </ul>
Course Learning Outcomes	At the end of the course, students are able to: <ol style="list-style-type: none"> <li>1. Write clear connected texts on a wide range of topics.</li> <li>2. Present ideas and opinions clearly and coherently.</li> <li>3. Interpret information from texts on various topics.</li> </ol>
Synopsis of Course Contents	This course is designed to improve students' English Language proficiency in terms of accuracy and language use at the intermediate level. Students will be exposed to a variety of reading texts in order to improve their reading skills. They will also be given ample speaking practice to develop their confidence in communicating and interacting with others in a multitude of situations. The course improves students' skills in writing texts coherently on various topics.
Assessment Weightage	Continuous Assessment: 60% Final Examination: 40%

### GLT1022: Speak Up

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	GLT1021
Course Learning Outcomes	At the end of the course, students are able to: <ol style="list-style-type: none"> <li>1. Present ideas clearly and accurately.</li> <li>2. Employ appropriate communication strategies to converse effectively.</li> </ol>
Synopsis of Course Contents	This course focuses on speaking English accurately and coherently at the intermediate level. It develops students' communication strategies that enable them to interact appropriately in a variety of informal situations.
Assessment Weightage	Continuous Assessment: 100% Final Examination: 0%

**GLT1023: Effective Workplace Writing**

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	GLT1021
Course Learning Outcomes	At the end of the course, students are able to: 1. Use appropriate format and language structures in correspondence writing. 2. Apply appropriate tone and style according to purposes of correspondence.
Synopsis of Course Contents	This course introduces writing strategies at the intermediate level. Students will be exposed to a range of workplace communication. They will learn how to produce effective written communication and improve their overall skills in writing.
Assessment Weightage	Continuous Assessment: 100% Final Examination: 0%

### English Communication Programme (Path 3)

#### GLT1024: Proficiency in English III

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	CEFR B2 <ul style="list-style-type: none"> <li>• MUET BAND 4</li> <li>• IELTS Band 5.5 – 6.0</li> <li>• TOEFL Paper – Based Test (513 – 547)</li> <li>• TOEFL Computer – Based Test (183 – 210)</li> <li>• TOEFL Internet – Based Test (65-78)</li> <li>• PTE (Academic) – (42 – 57)</li> <li>• FCE (B &amp; C)</li> <li>• GCE A Level (English) (Minimum C)</li> <li>• IGCSE/GCSE (English) (A, B &amp; C)</li> </ul>
Course Learning Outcomes	At the end of the course, students are able to: <ol style="list-style-type: none"> <li>1. Demonstrate an understanding of complex texts on concrete topics.</li> <li>2. Write clear, detailed texts on a wide range of subjects.</li> <li>3. Share opinions fluently and spontaneously.</li> </ol>
Synopsis of Course Contents	This course is designed to fortify students' English Language proficiency in terms of accuracy and effectiveness at a developing upper intermediate level. Students will be taught the four language skills with a focus on reading, writing and speaking. They will be exposed to a variety of texts to develop a higher level of proficiency that will allow them to apply the skills learnt.
Assessment Weightage	Continuous Assessment: 60% Final Examination: 40%

#### GLT1025: Effective Oral Communication

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	GLT1024
Course Learning Outcomes	At the end of the course, students are able to: <ol style="list-style-type: none"> <li>1. Write relevant outlines for presentations.</li> <li>2. Present an impromptu speech.</li> <li>3. Adhere to appropriate strategies in oral communication.</li> </ol>
Synopsis of Course Contents	The course encompasses different aspects of oral communication used in delivering speeches and presentations at the high intermediate level. Appropriate examples from a variety of situations are used as practice materials for students to analyse, discuss and apply the strategies taught.
Assessment Weightage	Continuous Assessment: 100% Final Examination: 0%

**GLT1026: Writing at the Workplace**

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	GLT1024
Course Learning Outcomes	At the end of the course, students are able to: 1. Write texts using appropriate tone and style. 2. Complete an informal report for workplace purposes. 3. Prepare a formal report for workplace purposes.
Synopsis of Course Contents	This course will introduce students to effective writing skills at the workplace. Using relevant materials, students will be taught in stages how to produce documents within a workplace context.
Assessment Weightage	Continuous Assessment: 100% Final Examination: 0%

### English Communication Programme (Path 4)

#### GLT1027: Advanced Oral Communication

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	CEFR C1 <ul style="list-style-type: none"> <li>• MUET BAND 5 &amp; BAND 6</li> <li>• IELTS Band 6.5 – 9.0</li> <li>• TOEFL Paper – Based Test (550 – 677)</li> <li>• TOEFL Computer – Based Test (213 – 300)</li> </ul> <ul style="list-style-type: none"> <li>• TOEFL Internet – Based Test (79 – 120)</li> <li>• PTE (Academic) (58 – 90)</li> <li>• FCE (A)</li> <li>• GCE A Level (English) (B &amp; A)</li> </ul>
Course Learning Outcomes	At the end of the course, students are able to: 1. Integrate the effective use of language structures in communication 2. Present a persuasive speech 3. Develop appropriate interpersonal communication skills.
Synopsis of Course Contents	The course encompasses different aspects of oral communication used in delivering speeches and presentations at the high intermediate level. Appropriate examples from a variety of situations are used as practice materials for students to analyse, discuss and apply the strategies taught.
Assessment Weightage	Continuous Assessment: 100% Final Examination: 0%

#### GLT1028: Advanced Business Writing

Credit	2
Course Pre-requisite(s) / Minimum Requirement(s)	CEFR C1 <ul style="list-style-type: none"> <li>• MUET BAND 5 &amp; BAND 6</li> <li>• IELTS Band 6.5 – 9.0</li> <li>• TOEFL Paper – Based Test (550 – 677)</li> <li>• TOEFL Computer – Based Test (213 – 300)</li> </ul> <ul style="list-style-type: none"> <li>• TOEFL Internet – Based Test (79 – 120)</li> <li>• PTE (Academic) (58 – 90)</li> <li>• FCE (A)</li> <li>• GCE A Level (English) (B &amp; A)</li> </ul>
Course Learning Outcomes	At the end of the course, students are able to: 1. Apply appropriate features of effective business writing. 2. Prepare documents common in business writing. 3. Produce a report for workplace purposes.
Synopsis of Course Contents	This course is designed to equip students with the necessary writing skills to meet the needs of the workplace. Students will also be taught how to produce clear, accurate and well organised professional business documents. Students will be required to analyse and respond to a variety of situations and to write for identified audiences. The course also explores the ways in which technology helps shape business writing and communication.
Assessment Weightage	Continuous Assessment: 100% Final Examination: 0%

**KIX1001: Matematik Kejuruteraan 1 / Engineering Mathematics 1**

Week	Topic & Activities
1.	<p>Fungsi: Had fungsi, had dan kesinambungan                      Derivatif: Konsep asas dan definisi, peraturan pembezaan, peraturan rantai, pembezaan parametrik dan tersirat, derivatif yang lebih tinggi.                      Aplikasi fungsi dan derivatif kejuruteraan: fungsi hampir, kecerunan garis lurus, kecekungan, gerakan dan derivatif kedua, kelengkungan satah lengkung.</p> <p><i>Functions: Limit of a function, limits and continuity                      Derivatives: Basic ideas and definitions, rules of differentiations, chain rule, Parametric and implicit differentiation, Higher derivatives.                      Engineering Applications of Functions and Derivatives: Approximating functions, The gradient of a straight line, Concavity, motion and the second derivatives, Curvature of a plane curves.</i></p>
2.	<p>Derivatif separa: Konsep asas dan definisi. Fungsi domain, pemboleh ubah bersandar dan pemboleh ubah tidak bersandar, derivatif separa peringkat lebih tinggi, pembezaan fungsi komposit dan fungsi tersirat.                      Derivatif separa menggunakan Jacobians, operasi pembezaan.                      Aplikasi kejuruteraan derivatif, satah tangen dan permukaan normal dalam tiga dimensi.</p> <p><i>Partial Derivatives: Basic ideas and definitions. Domain of the functions, Dependent and independent variables, Higher order partial derivatives, Differentiation of composite functions and implicit functions.                      Partial Derivatives using Jacobians, Differential operators.                      Engineering Applications of Partial Derivatives, Tangent planes and normal to surface in three dimensions.</i></p>
3.	<p>Vektor Algebra 1: Konsep asas, komponen kartesian, vektor dalam ruang, kecerunan, capahan, derivative arah curl.</p> <p><i>Vector Algebra I: Basic concepts, Cartesian components, Vectors in space, Gradient, Divergence, Curl Directional derivatives.</i></p>
4.	<p>Vektor Algebra II: Hasil darab skalaan dan hasil darab vektor, hasil darab trirangkap.</p> <p><i>Vector Algebra II: Scalar Product and Vector Product, Triple Product.</i></p>
5.	<p>Aplikasi kejuruteraan vektor algebra, Aplikasi kejuruteraan analisa vector.</p> <p><i>Engineering Applications of Vector Algebra, Engineering Applications of Vector Analysis.</i></p>
6.	<p>Algebra Matriks untuk Sistem Algebra Lelurus Tidak Homogen: Operasi Matriks Asas; Menyelesaikan Sistem Persamaan Lelurus Tidak Homogen; Penyongsangan Matriks; Kaedah Grafik; Peraturan Cramer; Kaedah Penghapusan; Penghapusan Gauss Naif; Penghapusan Gauss Secara Separa Pangsi; Bentuk Baris Eselon; Pengurangan Bentuk Baris Eselon; Pangkat; Pengantungan Lelurus; Aplikasi Kejuruteraan Sistem Persamaan Lelurus Tidak Homogen.</p> <p><i>Matrix Algebra for Non-Homogeneous Linear Algebraic System: Basic Matrices Operations; Solving Non-Homogeneous System of Linear Equations; Matrix Inversion Approach; Graphical Method; Cramer's Rule; Method of Elimination; Naïve Gauss Elimination; Gauss Elimination with Partial Pivoting; Row Echelon Form, Reduced Row Echelon Form, Rank, &amp; Linear Dependency; Engineering Application of Non-Homogeneous System of Linear Equations.</i></p>
7.	<p>Algebra Matriks untuk Sistem Algebra Lelurus Homogen: Menyelesaikan Sistem Persamaan Lelurus Homogen; Masalah Nilai Eigen/ Vector Eigen; Aplikasi Kejuruteraan untuk Masalah Nilai Eigen/ Vector Eigen; Pepenjuruan dan Penyambungannya; Teorem Cayley-Hamilton; Aplikasi Kejuruteraan untuk Sistem Algebra Lelurus Homogen.</p> <p><i>Matrix Algebra for Homogeneous Linear Algebraic System: Solving Non – Homogeneous System of Linear Equations; Eigenvalue/ Eigenvector Problem; Engineering Application of Eigenvalue/ Eigenvector Problem; Diagonalization &amp; Its Extension; Cayley-Hamilton Theorem; Engineering Application of Solving Homogeneous System of Linear Equations.</i></p>

8.	<p>Pengamilan: Konsep asas dan definisi, keedah pengamilan: kaedah penggantian, mengikut bahagian, pecahan separa. Kamiran wajar dan kamiran tidak wajar.</p> <p><i>Integration: Basic ideas and definitions, Techniques of Integrations: the substitution method, by parts, by partial fractions. Proper and Improper Integrals.</i></p>
9.	<p>Aplikasi pengamilan kejuruteraan: Kawasan pada satah, isipadu pepejal bagi keratan rentas yang diketahui, momen dan pusat jisim.</p> <p><i>Engineering Applications of Integrals: Areas of regions in the plane, Volumes of solids with known cross sections, Moment and center of mass.</i></p>
10.	<p>Pengamilan berganda: pengamilan ganda dua, pengamilan trirangkap.</p> <p><i>Multiple Integrals: Double Integrals and triple Integrals.</i></p>
11.	<p>Pengamilan berganda: pengamilan ganda dua, pengamilan trirangkap, kamiran isipadu.</p> <p><i>Multiple Integrals: Double Integrals and triple Integrals, volume integrals.</i></p>
12.	<p>Kamiran garisan dan kerja berlaku. Teorem Green dalam satu satah.</p> <p><i>Line integral and work done. Green's theorem in a plane.</i></p>
13.	<p>Kamiran permukaan.</p> <p><i>Surface Integrals.</i></p>
14.	<p>Teorem Stoke.</p> <p><i>Stoke's Theorem.</i></p>

**KIX1002: Matematik Kejuruteraan 2 / Engineering Mathematics 2**

<b>Week</b>	<b>Topic &amp; Activities</b>
1.	Pengenalan: Definisi dan Konsep Asas dalam Persamaan Pembezaan Biasa (ODE). Persamaan Pembezaan Turutan Pertama. <i>Introduction. Definitions and fundamental concept in ODE First order Differential Equations.</i>
2.	Teknik untuk Menyelesaikan Persamaan Pembezaan Turutan Pertama. <i>Strategy to Solve First Order Differential Equations.</i>
3.	Penyelesaian untuk Persamaan Pembezaan Turutan Kedua Homogen dan Linear. <i>Solutions to Homogeneous Linear Second Order ODE.</i>
4.	Penyelesaian untuk Persamaan Pembezaan Turutan Kedua Tidak Homogen dan Linear. <i>Solutions to Non-homogeneous Linear Second Order ODE.</i>
5.	Aplikasi Kejuruteraan bagi Persamaan Pembezaan Biasa. <i>Engineering Applications of ODE.</i>
6.	Penyelesaian Siri Kuasa untuk Persamaan Pembezaan. <i>Power Series Solutions for Differential Equations.</i>
7.	Kaedah Frobenius. <i>Frobenius Method.</i>
8.	Jelmaan Laplace. <i>Laplace Transform.</i>
9.	Jelmaan Laplace: Penyelesaian untuk Persamaan Pembezaan. <i>Laplace Transform: Solutions for Differential Equations.</i>
10.	Siri Fourier. <i>Fourier Series.</i>
11.	Siri Fourier: Fungsi-fungsi berkala; Siri Trigonometri; Fungsi-fungsi Genap dan Ganjil, Siri Fourier, Pengembangan Separuh Julat. <i>Fourier Series: Periodic functions; Trigonometric Series; Odd and even functions, Fourier Series, Half-range Expansion.</i>
12.	Persamaan Pembezaan Separa: Penyelesaian Umum untuk Persamaan Pembezaan Separa (PDE). <i>Partial Differential Equations: Solving General Solution of PDE.</i>
13.	Persamaan Pembezaan Separa: Penyelesaian Tertentu untuk Persamaan Laplace. <i>Partial Differential Equations: Solving Particular Solution of Laplace Equation.</i>
14.	Persamaan Pembezaan Separa: Penyelesaian Tertentu untuk Persamaan Haba & Persamaan Gelombang. <i>Partial Differential Equations: Solving Particular Solution of Heat Equation &amp; Wave Equation.</i>

**KIX2005: Undang-undang, Etika dan Kemampanan untuk Jurutera / Law, Ethics and Sustainability for Engineers**

Kod Kursus <i>Course Code</i>	KIX2005

**KIX2005: Undang-undang, Etika dan Kemampanan untuk Jurutera / Law, Ethics and Sustainability for Engineers**

<b>Minggu Week</b>	<b>Topik Topic</b>
1	Pengenalan kepada Lembaga Jurutera Malaysia (BEM) dan Institusi Jurutera Malaysia (IEM) <i>Introduction to the Board of Engineers, Malaysia (BEM) and the Institution of Engineers, Malaysia (IEM)</i>
2	Akta Pendaftaran Jurutera (REA) 1967 <i>Registration of Engineers Act 1967 (REA)</i>
3	Pembatalan, Pengguguran dan Pengembalian Semula <i>Cancellation, Removal and Reinstatement</i>
4	Jenis Tort, Liabiliti Tort dan Pembelaan terhadap Tort <i>Type of Tort, Tort Liability and Defence against Tort</i>
5	Pengenalan dan Isi Kandungan Kontrak Liabiliti, Pembatalan dan Penyelesaian Kontrak <i>Introduction and the Content of Contracts Liability, Cancellation and Settlement of Contracts</i>
6	Jenis-jenis Perkhidmatan Kejuruteraan <i>Type of Engineering Services</i>
7	Ujian Pertengahan Semester <i>Mid-Term Test</i>
8	Peranan Jurutera Peluang dalam profesion Etika di dalam kajian dan Penyelidikan  <i>Roles of Engineers Opportunities in the Profession Ethics in Experiment and Research</i>
9	Profesionalisme, Moral dan Etika  <i>Professionalism, Moral and Ethics</i>
10	Etika Kejuruteraan, Konflik dan Penyelesaian  <i>Engineering Ethics, Conflict and Resolution</i>
11	Pengenalan kepada Kelestarian, Rukun Kelestarian, Keselamatan Makanan, Alam Sekitar (udara dan air), Kajian Kes Industri  <i>Introduction to Sustainability, Pillars of Sustainability, Food Security, Environmental (air and water) Security, Industrial Case Studies</i>
12	Penilaian Kitaran Hayat (LCA) dan Matlamat Pembangunan Mampan (SDG)  <i>Life Cycle Assessment (LCA) and Sustainable Development Goals (SDG)</i>

13	Kejuruteraan Hijau (proses, bahan, bangunan, dll.) <i>Green Engineering (processes, materials, buildings, etc.)</i>
14	Rumusan Kursus <i>The Course Wrap Up</i>

**KIX2006: Ekonomi Kejuruteraan dan Pengurusan Projek / *Engineering Economics and Project Management***

Kod Kursus <i>Course Code</i>	KIX2006
Tajuk Kursus <i>Course Title</i>	Ekonomi Kejuruteraan dan Pengurusan Projek <i>Engineering Economics and Project Management</i>
Kredit <i>Credit</i>	3
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menghurai prinsip-prinsip, konsep-konsep asas dan kaedah dalam analisa ekonomi kejuruteraan dan pengurusan projek.</li> <li>2. Mengaplikasi kaedah-kaedah analisa ekonomi kejuruteraan dalam memilih rekabentuk penyelesaian yang bersaing.</li> <li>3. Mengaplikasi kaedah-kaedah pengurusan projek dalam melaksanakan dan mencapai matlamat-matlamat strategik organisasi.</li> <li>4. Menilai kesan keputusan-keputusan ekonomi kejuruteraan dan pengurusan projek ke atas organisasi dan masyarakat.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Describe the principles, basic concepts, and methodology of engineering economy analysis and project management.</i></li> <li>2. <i>Apply engineering economics analysis methods on choosing competing design solutions.</i></li> <li>3. <i>Apply project management methods in implementing and achieving strategic goals of the organization.</i></li> <li>4. <i>Evaluate implications of both engineering economy and project management decisions on organisation and society.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Kursus ini menawarkan pelajar-pelajar dengan konsep-konsep projek kejuruteraan yang mampu terhasil secara fizikal dan yang berpatutan dari segi ekonomi. Kursus ini membincangkan analisis kos dalam membuat keputusan kejuruteraan dan juga pengurusan dan pengawalan projek-projek yang kompleks. Topik-topik kejuruteraan ekonomi termasuklah konsep kos, kos kitaran hayat, rekabentuk ekonomik, kiraan setara, kiraan faedah, ukuran nilai pelaburan, analisa gantian dan analisa kos- manfaat. Topik-topik bagi pengurusan projek kejuruteraan pula termasuk kaedah-kaedah perancangan projek, organisasi, pengurusan risiko, anggaran kos dan bajet, penjadualan, laporan, penyeliaan dan pelaksanaan projek projek.</p> <p><i>This course provides students with the concepts of physically realizable and economically affordable engineering project. This course deals with cost analysis in engineering decision making as well as the management and control of complex projects. Engineering economics topics include cost concepts, life-cycle costing, design economics, equivalence calculations, interest considerations, measures of investment worth, replacement analyses and cost-benefit analysis. Engineering project management topics include methods for project planning, organization, risk management, cost estimating and budgeting, scheduling, reporting, monitoring, and implementation of projects.</i></p>
Pemberatan Penilaian <i>Assessment Weightage</i>	Penilaian Berterusan / <i>Continuous Assessment</i> : 40% Peperiksaan Akhir / <i>Final Examination</i> : 60%

**KIX2006: Ekonomi Kejuruteraan dan Pengurusan Projek / *Engineering Economics and Project Management***

<b>Minggu Week</b>	<b>Topik Topic</b>
1	Pengenalan kepada Ekonomi Kejuruteraan dan Pengurusan Projek <i>Introductions to Engineering Economy and Modern Project Management</i>
2	Konsep-konsep Kos dan Ekonomik Rekabentuk <i>Cost Concepts and Design Economics</i>
3	Pentakrifan projek dan Penganggaran Kos <i>Defining the Project and Cost Estimations</i>
4	Faktor-faktor: Bagaimana masa dan kadar bunga memberi kesan kepada wang <i>Factors: How Time and Interest Affect Money</i>
5	Faktor-faktor bergabung: Kadar Bunga nominal dan Efektif <i>Combining Factors: Nominal and Effective Interest Rates</i>
6	Menilai Projek Tunggal <i>Evaluating a Single Project</i>
7	Perbandingan dan Pemilihan Antara Projek-Projek <i>Comparison and Selection Among Alternatives: Financial and non-financial criteria</i>
8	Analisa Penggantian <i>Replacement Analysis</i>
9	Menilai Projek Awam Menggunakan Kaedah Faedah-Kos <i>Evaluating Public Project Using Benefit-Cost Ratio Method</i>
10	Membangun Pelan Projek <i>Developing a Project Plan</i>
11	Mengurus Risiko <i>Managing Risk</i>
12	Pengagihan Sumber dan Penjadualan; Menjejak dan Mengawal Projek <i>Resource Allocation and Scheduling; Project Tracking and Control</i>
13	Pengkomputeran Pengurusan Projek dan Perancang Projek Microsoft <i>Project Management Computing and Microsoft Project Planner</i>
14	Pembentangan Projek Berkumpulan <i>Group Project Presentation</i>

# **COURSE INFORMATION**

## **Department Courses**

**KIA1003: Bahan Kejuruteraan Awam / *Civil Engineering Materials***

Kod Kursus <i>Course Code</i>	KIA1003
Tajuk Kursus <i>Course Title</i>	Bahan Kejuruteraan Awam <i>Civil Engineering Materials</i>
Kredit <i>Credit</i>	3
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menerangkan sifat-sifat bahan utama konkrit dan kesan terhadap sifat-sifat segar dan keras konkrit.</li> <li>2. Menjalankan ujian-ujian piawai untuk menilai sifat-sifat konkrit dan bahan-bahan utamanya.</li> <li>3. Rekabentuk campuran konkrit dengan gred kekuatan yang berbeza dan keperluan keboleherjaan.</li> <li>4. Mengenalpasti sifat-sifat utama batu dan blok, besi, kayu, asphalt dan bitumen untuk aplikasi kejuruteraan awam.</li> <li>5. Menerangkan kelakuan dan sebab-sebab kegagalan bahan kejuruteraan awam.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Explain the properties of concrete constituent materials and influence on fresh and hardened properties of concrete.</i></li> <li>2. <i>Perform standard tests to evaluate properties of concrete and the constituent materials.</i></li> <li>3. <i>Design concrete mixtures with different strength grades and workability requirements.</i></li> <li>4. <i>Identify the main properties of bricks and blocks, timber, steel, asphalt and bitumen for civil engineering application.</i></li> <li>5. <i>Explain the behaviour and causes of failure of civil engineering materials.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Kursus ini memperkenalkan bahan kejuruteraan awam biasa seperti konkrit (dan setiap bahan utamanya – simen, agregat, air, bahan tambahan), batu dan blok, kayu, besi, asphalt dan bitumen. Sifat dan kelakuan setiap bahan serta kepentingan dalam aplikasi kejuruteraan awam diliputi dalam kursus ini. Kursus ini juga memperkenalkan ujian-ujian bahan konkrit dan rekabentuk campuran konkrit.</p> <p><i>The course introduces common civil engineering materials such as concrete (and each of its constituent material – cement, aggregate, water, admixture), bricks and blocks, timber, steel, asphalt and bitumen. The properties and</i></p>

	<i>behaviour of each material as well as the importance for civil engineering application are covered in this course. The course also introduces tests on concrete materials and design of concrete mixtures.</i>
Pemberatan Penilaian <i>Assessment Weightage</i>	Penilaian Berterusan / <i>Continuous Assessment</i> : 40% Peperiksaan Akhir / <i>Final Examination</i> : 60%

**KIA 1004: Mekanik Bahan / *Mechanics of Materials***

Kod Kursus <i>Course Code</i>	KIA 1004
Tajuk Kursus <i>Course Title</i>	Mekanik Bahan <i>Mechanics of Materials</i>
Kredit <i>Credit</i>	3
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Mengetahui pasti tegangan, terikan dan ubah bentuk rasuk dan tiang.</li> <li>2. Mengetahui pasti kilasan untuk anggota bulat dan bukan-bulat, pusat ricih dan aliran ricih untuk anggota rasuk dan ber dinding nipis.</li> <li>3. Menganalisa transformasi tegangan dan terikan dengan menggunakan kaedah pengiraan dan juga kaedah grafik (Bulatan Mohr).</li> <li>4. Menganalisis rasuk dan kerangka dengan prinsip-prinsip analisis plastik.</li> <li>5. Menunjukkan kemampuan mengatur dan melakukan eksperimen makmal/ maya pada tahap ketepatan tertentu.</li> </ol> <p><i>At the end of this course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Identify the stresses, strains and deformation of beams and columns.</i></li> <li>2. <i>Identify torsional circular and non-circular members and shear flow of beams and thin-walled members.</i></li> <li>3. <i>Analyse the stress and strain transformation using the computational as well as the graphical method (Mohr's Circle).</i></li> <li>4. <i>Analyse beams and frames using the principles of plastic analysis.</i></li> <li>5. <i>Demonstrate the ability to organise and conduct laboratory/ virtual experiments with a certain degree of precision.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Kursus ini bermula dengan analisis tegangan, terikan dan ubah bentuk rasuk dan tiang. Ia diikuti dengan teori kilasandan formula untuk keratan bulat dan bukan bulat bersama-sama dengan aliran ricih bagi rasuk dan anggota ber dinding nipis. Kemudian, ia meliputi analisis bagi transformasi tegangan dan terikan. Kursus ini berakhir dengan kaedah analisis plastik.</p> <p><i>This course starts off with analysis of stresses, strains and deformation of beams and columns. It follows with torsional theory and formula for circular and non- circular sections together with shear flow for beams and thin-walled</i></p>

	<i>members. Then, it covers the analysis of stress and strain transformations. The course ended with plastic analysis method.</i>
Pemberatan Penilaian <i>Assessment Weightage</i>	Penilaian Berterusan / <i>Continuous Assessment</i> : 40% Peperiksaan Akhir / <i>Final Examination</i> : 60%

**KIA1005: Ukur Kejuruteraan / Engineering Survey**

Kod Kursus <i>Course Code</i>	KIA1005
Tajuk Kursus <i>Course Title</i>	Ukur Kejuruteraan <i>Engineering Survey</i>
Kredit <i>Credit</i>	3
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menerangkan konsep asas teknik asas ukur.</li> <li>2. Menyelesaikan planimetric titik kawalan, ketinggian, luas dan isipadu dengan menggunakan konsep terabas, pengarasan dan kaedah-kaedah dan formula yang sesuai.</li> <li>3. Menggunakan formula dalam pengiraan lengkungan mendatar dan menegak untuk menjadualkan nilai bagi menetapkan garisan tengah jalan raya yang dicadangkan.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Describe the fundamental concept of surveying technique.</i></li> <li>2. <i>Solve the planimetric control points, heights, areas and volumes by applying the concept of traversing, levelling and appropriate methods and formulae.</i></li> <li>3. <i>Employ the formulae in the computation of horizontal curves and vertical curves to tabulate the values for setting out the centre line of the proposed road.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Kepentingan dan objektif kerja-kerja ukur kepada jurutera awam. Konsep asas pengukuran. Konsep ukur daripada keseluruhan kepada bahagian-bahagian. Ringkasan sistem pemetaan di Malaysia. Elemen-elemen asas teodolit. Tatacara terabas oleh teodolit, peninjauan, pembukuan, pengurangan dan penyelarasan data. Sumber ralat dalam teodolit. Pengiraan kodinat dan luas oleh kaedah kodinat. Prinsip pengarasan dan peralatan untuk mengukur aras. Prosedur kerja pengarasan, pembacaan, pembukuan dan penyelarasan data. Sumber ralat dalam pengarasan dan kaedah untuk menghapuskannya. Teori dan prinsip kaedah stadia. Pengukuran oleh kaedah stadia untuk jarak penglihatan mendatar. Pengukuran oleh kaedah stadia untuk jarak penglihatan tidak mendatar. Kaedah substen bar, kaedah baji optic dan sistem pengurangan automatik. Kontur dan pengambilan maklumat terperinci oleh takimetri. Ralat dalam kerja-kerja takimetri. Prinsip planimeter dan penggunaannya. Pengiraan keluasan bersisi lurus, kaedah kodinat, kaedah</p>

	<p>bearing dan jarak. Pengiraan luas bersisi tidak sekata. Trapezoid dan peraturan Simpson untuk pengiraan keluasan. Pengiraan kerja tanah oleh keratan rentas dan membujur. Isipadu dengan kaedah "purata keluasan" dan "kaedah keluasan hujung". Isipadu berdasarkan "prismoidal" formula. Kesan lengkungan dalam pengiraan isipadu kerja tanah berdasarkan Teorem Pappus. Isipadu daripada garisan kontur dan titik tinggi. Rekabentuk lengkungan bulat, lengkungan peralihan dan menegak. Pengiraan menetapkan lengkungan di padang. Persamaan lengkungan peralihan. Kaedah untuk menetapkan lengkungan; kaedah pita, kaedah dua teodolit dan kaedah menggunakan stesen kawalan jauh. Masalah dengan jarak penglihatan dipadang.</p> <p><i>The importance and objective of survey works to civil engineers. Basic principles in measurement. Survey concept from whole to parts. Summary of mappingsystem in Malaysia. Basic elements of a theodolite. Test, use and correction of errors of a theodolite. Procedure of traversing by theodolite, observation, booking, reduction and adjustment of data. Sources of errors in theodolite traversing works and steps required to remove them. Computation of coordinates and area by coordinate method. Principles of levelling. Equipment of levelling. Test and adjustment of a level instrument. Work procedure on levelling, reading, booking and reduction of data. Sources of error in levelling and methods to eliminate them. The theory and principle of stadia method. Measurement by stadia method for horizontal sight distance. Measurement by stadia method for not horizontal sight distance. Substense Bar method, Optical Wedge and automatic reduction system. Contour and taking details by tacheometry. Errors in tacheometry works. Principles of planimeter and its usage. Area enclosed by straight lines, coordinate method, bearing method and distances. Computation of area of irregular figures. Trapezoidal and Simpson's rules for computation of area. Computation of earthwork by cross and longitudinal section. Volume by "mean areas" and "end areas.". Volume based on "prismoidal" formulae. Effect of curvature in computation of earthwork volume based on Pappus's Theorem. Volume from contour and spot levels. Design of circular curve, transition curve and vertical curve. Computation for setting out curve at field. Equation of transition curve. Methods for setting out curve; tape method, two theodolite method and method using control remote station. Problems with sighting distance at field.</i></p>
<p>Pemberatan Penilaian <i>Assessment Weightage</i></p>	<p>Penilaian Berterusan / <i>Continuous Assessment</i>: 40% Peperiksaan Akhir / <i>Final Examination</i>: 60%</p>

**KIA1006: Lukisan untuk Jurutera Awam dan CAD / *Civil Engineering Drawing and CAD***

Kod Kursus <i>Course Code</i>	KIA1006
Tajuk Kursus <i>Course Title</i>	Lukisan untuk Jurutera Awam dan CAD <i>Civil Engineering Drawing and CAD</i>
Kredit <i>Credit</i>	3
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menerangkan komponen-komponen asas, konsep dan teknik-teknik lukisan kejuruteraan awam.</li> <li>2. Melukis elemen-elemen asas grafik kejuruteraan awam melalui pengaplikasian pengetahuan di dalam pelbagai teknik lukisan kejuruteraan.</li> <li>3. Menggunakan lukisan rekabentuk terbantu komputer (CAD) untuk menghasilkan pelbagai lukisan-lukisan teknikal kejuruteraan awam.</li> <li>4. Mengaplikasikan pengetahuan tentang teknik- teknik lukisan kejuruteraan awam dan lukisan rekabentuk terbantu komputer (CAD) menyelesaikan masalah kejuruteraan awam.</li> <li>5. Menunjukkan kemampuan menggunakan perisian untuk menjana keputusan.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Describe the basic components, concepts, and techniques of civil engineering drawing.</i></li> <li>2. <i>Draw graphic basic civil engineering elements through the application of knowledge in various engineering drawing techniques.</i></li> <li>3. <i>Use computer-aided design drawing (CAD) to produce various technical civil engineering drawings.</i></li> <li>4. <i>Apply the knowledge of civil engineering drawing techniques and computer-aided design drawing to solve civil engineering problem.</i></li> <li>5. <i>Demonstrate the ability of using software to generate output.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	Kursus ini memberikan pengenalan kepada lukisan-lukisan kejuruteraan awam seperti bangunan, dinding, asas, lantai, tangga, bumbung, kekuda, pintu, tingkap dan sebagainya. Asas kepada lukisan kejuruteraan menggunakan lakaran tangan, dan lukisan terbantu komputer (AutoCad) diliputi. Prinsip asas pandangan keratan dan isometri dipelajari. Pelajar akan dapat menggunakan kemahiran lukisan kejuruteraan sebagai satu cara untuk menyampaikan idea, maklumat dan arahan secara tepat dan jelas.

	<i>This course gives introduction to civil engineering drawings such as buildings, walls, foundations, floors, staircases, roofs, trusses, doors, windows, etc. The basics of engineering drawing utilising free hand sketching, and computer aided drafting (Auto CAD) are covered. The fundamental principles of sectional views and isometric views are taught. The student will be able to use engineering drawing skills as a means of accurately and clearly communicating ideas, information and instructions.</i>
Pemberatan Penilaian <i>Assessment Weightage</i>	Penilaian Berterusan / <i>Continuous Assessment</i> : 100%

**KIA1007: Pengaturcaraan dan Sistem Maklumat / *Programming and Information System***

Kod Kursus <i>Course Code</i>	KIA1007
Tajuk Kursus <i>Course Title</i>	Pengaturcaraan dan Sistem Maklumat <i>Programming and Information System</i>
Kredit <i>Credit</i>	3
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menghuraikan konsep GIS termasuk aplikasi, komponen sistem dan kebolehfungsiannya.</li> <li>2. Menunjukkan kebolehan mengaplikasikan perisian GIS untuk pemetaan/ ramalan/ pemodelan.</li> <li>3. Menunjukkan kemampuan menggunakan perisian untuk menjana keputusan.</li> <li>4. Menterjemah masalah-masalah kejuruteraan ke dalam program computer-proses pembangunan.</li> <li>5. Membangunkan kod program komputer untuk menyelesaikan masalah-masalah kejuruteraan.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Explain the GIS concepts including applications, system components and its functionality.</i></li> <li>2. <i>Demonstrate capability of applying GIS software for mapping/prediction/modelling.</i></li> <li>3. <i>Demonstrate the ability of using software to generate output.</i></li> <li>4. <i>Translate engineering problems into computer program-development process.</i></li> <li>5. <i>Develop computer programme code to solve engineering problems.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Kursus ini dibahagikan kepada dua bahagian: GIS dan Program Komputer. Bahagian pertama memperkenalkan konsep sistem maklumat geografi (GIS) termasuk aplikasi, komponen sistem dan kebolehfungsiannya. Ini diikuti dengan aplikasi praktikal perisian GIS untuk menjalankan projek. Bahagian kedua adalah program komputer. Bahagian ini memberikan pengenalan dalam pengaturcaraan komputer. Asas perkakas pengaturcaraan dan prosedur pengaturcaraan diliputi. Perkembangan kod komputer untuk menyelesaikan masalah matematik dan kejuruteraan dimasukkan. Ini diikuti dengan menjalankan kod program komputer yang lengkap dalam PC dan akhirnya</p>

	<p>menunjukkan betapa program terbentuk boleh digunakan untuk menyelesaikan masalah tertentu</p> <p><i>This course is divided into two parts: GIS and Computer Programming. The first part introduces the geographical information systems (GIS) concepts including applications, system components and its functionality. This is followed by practical application of GIS software to carry out a project. The second part is the computer programming. This part introduces the process of computer programming. Basic programming tools and programming procedures are covered. Development of computer codes to solve mathematical and engineering problem are included. This is followed by running the complete computer program codes on PC and finally demonstrating how the developed program can be used to solve a particular problem.</i></p>
<p>Pemberatan Penilaian <i>Assessment Weightage</i></p>	<p>Penilaian Berterusan / <i>Continuous Assessment</i>: 100%</p>

**KIA2003: Mekanik Bendalir / Fluid Mechanics**

Kod Kursus <i>Course Code</i>	KIA2003
Tajuk Kursus <i>Course Title</i>	Mekanik Bendalir <i>Fluid Mechanics</i>
Kredit <i>Credit</i>	3
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menghuraikan konsep asas bendalir statik dan dinamik</li> <li>2. Menyelesaikan tekanan hidrostatik dan daya serta kesinambungan, Bernoulli dan persamaan momentum untuk pelbagai masalah</li> <li>3. Menggunakan persamaan untuk aliran lamina dan bergelora, lapisan sempadan, seretan, pam, paip, analisis dimensi dan persamaan</li> <li>4. Menjalankan ujikaji, menganalisa dan menginterpretasi data untuk membuat kesimpulan</li> <li>5. Mempamerkan kebolehan untuk menjalankan ujikaji mekanik bendalir.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Explain the fundamental concept of fluid statics and dynamics</i></li> <li>2. <i>Solve the hydrostatic pressure and forces and the continuity, Bernoulli and momentum equations for various problems</i></li> <li>3. <i>Apply equations for laminar and turbulent flows, boundary layer, drag, pumps, pipes, dimensional analysis and similitude</i></li> <li>4. <i>Conduct experiment, analyse and interpret data to provide conclusions</i></li> <li>5. <i>Demonstrate the ability to conduct fluid mechanic experiment.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Kursus ini bertujuan memperkenalkan mekanik bendalir dan kepentingannya dalam kejuruteraan awam. Ia bermula dengan definisi bendalir, Hukum Pascal, dan pengukuran tekanan. Konsep asas bagi bendalir statik dan bergerak, persamaan yang berkaitan dan aplikasinya seterusnya dibincangkan. Kursus ini berakhir dengan analisa lapisan sempadan, aliran dalam paip dan analisis dimensi dan penyamaan.</p> <p><i>This course aims to introduce fluid mechanics and establish its relevance in civil engineering. It starts with the definition of fluid properties, Pascal law and pressure measurement. The underlying concept of fluid statics and dynamics,</i></p>

	<p><i>the relevant equations and their applications are discussed. Ended with the analysis in boundary layer, flowing fluid in pipelines and dimensional analysis and similitude.</i></p> <p>.</p>

**KIA3001: Statistik dan Teknik Berangka / *Statistics and Numerical Techniques***

Kod Kursus <i>Course Code</i>	KIA3001
Tajuk Kursus <i>Course Title</i>	Statistik dan Teknik Berangka <i>Statistics and Numerical Techniques</i>
Kredit <i>Credit</i>	3
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Mengkaji membuat keputusan statistik bagi sampeldan populasi.</li> <li>2. Menganalisa konsep membuat keputusan dan modelempririk.</li> <li>3. Menggunakan rumus yang sesuai untuk menyelesaikan masalah kalkulus secara berangka.</li> <li>4. Menentukan rumus yang sesuai dalam menyelesaikan persamaan pembeza secara berangka.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Examine statistical decision making for samplesand populations.</i></li> <li>2. <i>Analyse the concept of decision making andempirical models.</i></li> <li>3. <i>Employ suitable formulae in solving calculus problems numerically.</i></li> <li>4. <i>Determine suitable formulae in solving differential equations numerically.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Bahagian pertama pengenalan kepada statistik kejuruteraan yang mana merangkumi kedua-dua huraian dan teknik beranalisis untuk mengendalikan kepelbagaiandata. Cara mengaplikasi analisis statistik menggunakan perisian komputer juga akan diberikan. Dalam bahagian kedua, kursus ini akan memberikan pelajar pengenalan kepada teknik berangka dan statistik taabir dalam menyelesaikan masalah kejuruteraan. Pelajar akan didedahkan kepada proses menghasilkan program yang ringkas dan teratur dalam pakej perisian komputer untuk menghasilkan penyelesaian secara berangka.</p> <p><i>The first part introduces to engineering statistics which includes both descriptive and analytical methods for dealing with variability in observed data. Also, included are guided applications to simple statistical analysis using software. In the second part, this course provides students with sound introduction to numerical methods and inferential statistics in solving</i></p>

	<i>engineering problems. Students will be exposed to developing simple, well-structured programs in chosen software packages to find solution numerically</i>
Pemberatan Penilaian <i>Assessment Weightage</i>	Penilaian Berterusan / <i>Continuous Assessment</i> : 40% Peperiksaan Akhir / <i>Final Examination</i> : 60%

Tajuk Kursus <i>Course Title</i>	Projek Tahun Akhir <i>Final Year Project</i>
Kredit <i>Credit</i>	6
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Mereka bentuk ujikaji, analisis atau pelan pemerhatian bagimemenuhi objektif-objektif kajian.</li> <li>2. Mengenalpasti teknik makmal dan/atau perisian yang sesuai, sumber dan kejuruteraan dan peralatan IT yang moden, termasuk ramalan dan pemodelan untuk analisis dan simulasi data.</li> <li>3. Menunjukkan analisis sains dan kejuruteraan yang mendalam dengan penilaian isu-isu kemampanan social, dan persekitaran yang berkaitan dengan topik penyelidikan.</li> <li>4. Berupaya mengkaji pelbagai pilihan penyiasatan yang berterusan untuk pendekatan dalam persoalan penyelidikan seperti eksperimen, analisis, simulasi dan pengoptimuman</li> <li>5. Memuktamadkan penyiasatan untuk mentafsir teori, dapatan dan/atau data dengan kajian dengan pengetahuan dan kaedah-kaedah yang bersesuaian.</li> <li>6. Berupaya membina kemahiran pembentangan yang diperlukan untuk menyampaikan secara berkesan tujuan, skop, penemuan dan kesimpulan penyelidikan.</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Design experiments, analysis or observation plan to fulfil objectives of the research.</i></li> <li>2. <i>Specify appropriate laboratory and/or software techniques, resources, and modern engineering and IT tools, including prediction and modelling for data analysis and simulation.</i></li> <li>3. <i>Demonstrate in depth science or engineering analysis with examination of societal and environmental sustainability issues related to the research topic.</i></li> <li>4. <i>Synthesize a range of continuous investigative options for approaching the research questions, such as experimentations, analysis, simulations and optimizations.</i></li> <li>5. <i>Conclude investigation to interpret the theory, finding and/or data with appropriate research knowledge and methods.</i></li> <li>6. <i>Demonstrate presentation skills needed to effectively communicate for the purpose, scope and conclusion of the research.</i></li> </ol>

<p>Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i></p>	<p>Kursus ini memerlukan pelajar untuk menjalankan projek penyelidikan dalam satu topik Kejuruteraan Awam yang terpilih di bawah penyeliaan seorang kakitangan akademik. Penyelidikan boleh dilaksanakan dalam bentuk kajian literatur, kajian eksperimen, permodelan, simulasi, pengiraan, kajian kes, soal-selidik, dll. Hasil penyelidikan perlu dilaporkan dalam bentuk pengenalan, objektif penyelidikan, skop kajian, kajian literature, metodologi penyelidikan, pengumpulan data/kerja eksperimen, analisis data, keputusan dan perbincangan, kesimpulan dancadangan, dan rujukan. Satu laporan saintifik dalam bentuk tesis perlu dihantar pada akhir penyelidikan dan pelajar perlu menyampaikan hasil penyelidikan tersebut melalui satu persembahan lisan.</p> <p><i>This course requires students to undertake a research project on a chosen topic in Civil Engineering under the supervision of an academic staff. Research can be conducted in the form of literature review, experimental study, modelling, simulation, computational, case study, survey, etc. Research findings should be reported in the form of introduction, objectives of research, scope of study, literature review, research methodology, data collection/experimental work, data analysis, results and discussions, conclusions and recommendations, and references. A scientific report in the form of a thesis should be submitted at the end of the research and the student is required to communicate the findings of the research through an oral presentation.</i></p>
<p>Pemberatan Penilaian <i>Assessment Weightage</i></p>	<p>Penilaian Berterusan / <i>Continuous Assessment</i>: 100%</p>

**KIA 4020: Jurutera dan Masyarakat / *Engineers and Society***

Kod Kursus <i>Course Code</i>	KIA 4020
Tajuk Kursus <i>Course Title</i>	Jurutera dan Masyarakat <i>Engineers and Society</i>
Kredit <i>Credit</i>	2
Bahasa Pengantar <i>Medium of Instruction</i>	Bahasa Inggeris <i>English</i>
Prasyarat/Keperluan Minimum Kursus <i>Course Pre-requisite(s)/ Minimum Requirement(s)</i>	Tiada <i>No</i>
Hasil Pembelajaran Kursus <i>Course Learning Outcomes</i>	<p>Di akhir kursus ini, pelajar dapat:</p> <ol style="list-style-type: none"> <li>1. Menyatukan dengan masyarakat sebagai prospektif jurutera awam dalam menyelesaikan masalah yang melibatkan kejuruteraan awam.</li> <li>2. Menunjukkan tingkah laku dan kelakuan profesional yang membimbing amalan profesional dan perkhidmatan jurutera awam kepada masyarakat.</li> <li>3. Menyusun sumber dan input secara sistematik daripada semua ahli pasukan dan membuat keputusan kolektif untuk memastikan kejayaan pasukan melalui projek</li> </ol> <p><i>At the end of the course, students are able to:</i></p> <ol style="list-style-type: none"> <li>1. <i>Integrate with the community as a prospective civil engineer in solving problems involving the civil engineering profession.</i></li> <li>2. <i>Demonstrate the ethical and professional conduct that guide a civil engineer's professional practice and service to the community</i></li> <li>3. <i>Organise resources and inputs systematically from all team members and make collective discussion to ensure team success through a project.</i></li> </ol>
Sinopsis Kandungan Kursus <i>Synopsis of Course Contents</i>	<p>Objektif utama kursus ini adalah untuk membolehkan pelajar menyumbang kepada masyarakat dengan menerapkan pengetahuan dan kemahiran yang dipelajari di dalam kelas untuk membantu menyelesaikan masalah tempatan. Ini adalah salah satu agenda penting di Kementerian Pengajian Tinggi untuk diterjemahkan di peringkat universiti dan boleh dianggap sebagai usaha mulia oleh universiti dalam melahirkan graduan yang holistik dengan melibatkan mereka dalam membantu masyarakat setempat. Di samping itu, pelajar mesti dapat memahami peranan etika kejuruteraan dan tanggungjawab profesional jurutera terhadap keselamatan awam; kesan aktiviti kejuruteraan: ekonomi, sosial, budaya, persekitaran dan kelestarian. Penilaian berterusan untuk kursus ini terbahagi kepada dua bahagian iaitu: (1) Satu Kajian Kes (Laporan dan Pembentangan Interim) dan (2) Projek Masyarakat Bersepadu (ISP) (Laporan Akhir &amp; Montaj Video). ISP adalah projek berkumpulan yang tidak melebihi 5 pelajar setiap kumpulan.</p>

	<p><i>The main objective of this course is to enable students to contribute to the community by applying knowledge and skills learned in the classroom to help solve local problems. It is one of the important agendas in the Ministry of Higher Education to be translated at the university level and can be considered as a noble effort by the university in producing holistic graduates by engaging them in helping the local community. In addition, students must be able to comprehend the role of engineering ethics and the professional responsibility of an engineer to public safety; the impacts of engineering activity: economic, social, cultural, environmental and sustainability. The continuous assessment for this course is divided into two parts namely: (1) A Case Study (Interim Report &amp; Presentation) and (2) Integrated Society Project (ISP) (Final Report &amp; Video Montage). The ISP is a group project of not more than 5 students per group.</i></p>
